Check List for Evacuation Analyses

This note describes the steps involved in conducting an evacuation analysis to ensure a speedy and comprehensive analysis. We are looking forward to a fruitful co-operation!

1. Your Enquiry

If you are interested in an analysis, please contact us by email of phone and provide the following data (if possible). The more information we get, the more precise we can estimate our effort.

- A floor plan of the complete geometry,
- Amount and distribution of persons,
- Distribution of egress routes,
- Scenarios to be evaluated, and
- The timeframe for the analysis.

Settled on: ____________________________

2. Our Offer

Based on your information we prepare a binding offer with a specification, cost figures, timeframe and general conditions.

Received on:____________________________

3. Placing the Order

When the Offer suits your needs, place the order.

Offer placed on: ________________________

4. Data Transmission

In order to execute the analysis, we need you to provide the following data. Please let us know if we should arrange a transfer directory on our cloud server for you.

- All required CAD drawings in dxf or dwg format,
- Data concerning the egress routes, and
- All information about the initial distribution of persons.

Transmitted on: ________________________

5. Delivery of Results

You will receive the evaluation report and our invoice by email. If needed, we can also provide the result files.

Received on: ___________________________

6. Questions

If you have any questions or in case that further analyses are required, feel free to contact us!
